SOLARO AIRE

Your Solaro Aire™ Basement System is meant to be installed in a commercial building or residential basement.

Solaro Aire™ **Basement System**

The Basement system was designed to be installed in commercial or residential basements. This system will clean and circulate clean air.

Solaro Aire™ **High Profile**

Ideal for applications where additional clearance (2") is needed **between the bottom of the fan and the roof**. Perfect for snowy areas or "S" tile roofs where less clearance could cause airflow problems.

Solaro Aire™ **Gable**

Can be mounted inside the attic over an existing gable vent or roof penetration to supercharge the vents already there. Remains hidden and out of the weather, safe for the remote mounted solar panel. No large holes to cut in your roof.

Solaro Aire™ **Tilt**

27 watt or 37 watt solar panel, perfect for any installation that requires directing the panel towards the sun for better performance. 360° rotation and 35° tilt make it perfect for less than ideal fan locations.

Solaro Aire™ **Remote**

Allows the solar panel location to be independent from the fan's so each can be placed in the ideal part of the roof. Can also be used with larger solar panels for improved performance or to offset poor light environments.

The Benefits of the Solaro Aire™

Solar Powered Basement Ventilation System

All of the Solaro Aire™ attic fans qualify for a 30% Federal Tax Credit on materials and installation through the American Recovery and Reinvestment Act of 2009.

The Solaro Aire™ Limited Lifetime Warranty is the strongest in the industry.

The Solaro Aire™ doesn't cost one penny to operate! It's completely powered by the sun!

Built to be dependable. Weather resistant powder coated finish on all exposed fan parts provide a handsome and durable finish.

Cleans the basement stale air and circulates air for the entire home. Designed to be placed on the wall so it doesn't take up space.

how does it
WORK?

All year round, your home needs to be ventilated. This includes all areas of the home as well as the basement. With the Solaro Basement System, you can circulate the air from the living space to the basement that will lead the air to the outside. This helps prevent stale air that can cause bad odor. The basement system operates at 550 CFM. Other problems from stagnant air can cause mildew build up, mold, or bugs that seek out damp and warm areas. With this system ventilating up to approximately 116.1 sq.m. it can make your home healthier and smelling cleaner.

With the Solaro Basement System in your home, it can help prevent these problems. Not only can it help your home have clean air, it can save on your electric bill. This system is completely solar powered. This system comes with the unit itself, solar panel (27 watt, 37 watt, or 40 watt) and also a 25ft cable. This system is also capable of using a Day/Night KIT. This allows the unit to run from AC power to DC power.

features & benefits
SOLARO AIRE

DAY/NIGHT KIT

The Day/Night KIT allows the basement system to switch from DC power to AC power. This a solar powered system, however the unit naturally turns off when the sun goes down. But with the Day/Night KIT you can switch to AC power. This allows the unit to run night and day.

LOW MAINTENANCE

The Solaro Aire are easy to install and operate and guaranteed to operate for years. There is very minimal maintenance, however if you feel that the solar panel needs to be cleaned please do so. Also, if you feel that the vents are dirty, clear any lints that may be in the way of air flow.

CLEANS THE AIR

This unit was designed to clean the air. Since this unit will be placed in the basement, the unit will draw air from the living space and direct it towards the basement. The unit will then ventilate the air through ducts that lead outside. This unit not only clears the air it also helps with naturally occurring radon gas.

Brushless Electronic Motor with Maximum Yield Technology. This new motor technology was developed by Solaro Energy - Our engineers leveraged lessons learned from our original brushless electronic motor that we used for over 12 years. This new motor technology offers about 30% better efficiency and air moving performance, with an amazing 100,000 hours average motor run time! That's about 25 years of system operation time!

*You won't need to worry about rust or corrosion issues in diverse weather, a special Corrosion Resistant Aluminum Alloy is used for all structural components within the Solaro Aire™. **NO plastic parts**, unlike the competition, which can deteriorate quickly in heat or cold.*

Solaro Aire
Solar Powered Basement System

MAXIMUM EFFICIENCY: Our advanced solar powered Basement Systems are not only easy to install and maintain, but are highly developed and extremely efficient. Making them the most effective basement system on the market! Day/Night KIT is also available. The basement system can keep you and your home healthy by circulating the air nonstop. This functionality provides insurance that it can prevent stale air and molds forming in the basement.
